**E**xperience life on a working farm and discover the way food connects us to soil, sun, water, and each other. Hour-long tours by horse-drawn wagon begin promptly at 10 AM and again at 1 PM.

Discover how vegetables, herbs and flowers are grown without the use of pesticides or chemicals, and pasture-grazed farm animals are raised.

Find out how organic practices are good for your health, the land's health, and the health of all who work there.

Learn how an Agricultural Conservation Easement — stewarded by The Land Conservancy — protects the farm for all time. It assures that the land will continue to be used only for organic crops and pasture, as it has been for more than 200 years.
