

I-74 Scenic Greenway UPDATE: May 2005

The 19-mile gateway through western Hamilton County has long been cherished for its scenic vistas. With boundaries defined by the Land Conservancy, the Greenway is our

ongoing preservation project. We work with private property owners and conservation partners to protect threatened land and water resources located in the Greenway – for the

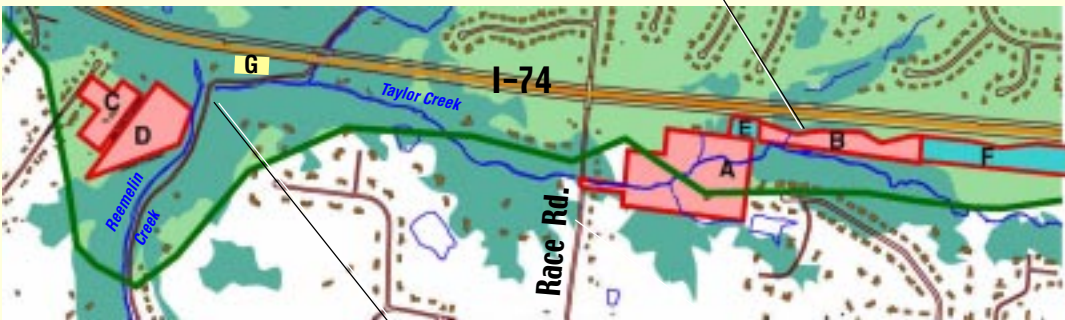

benefit of all citizens. As of early 2005, land purchases and Conservation Easements (CE) permanently protect a total of 35 acres of forest and floodplain in the Greenway.

Half-mile of scenic views protected in Green Township!
